EDUCATION

Wilfrid Laurier University

Bachelor of Science in Computer Science, Minor in Mathematics

Waterloo, ON

Sept 2022 – Present

- **Concentration:** Big Data Systems
- **Relevant Coursework:** Software Engineering, Databases, Data Structures, Operating Systems, Computer Networks, Algorithm Design & Analysis

EXPERIENCE

Clio

Software Developer Intern

Toronto, ON

Jan 2026 – Mar 2026

- Investigated high-latency API endpoints using **Datadog** tracing and logs; identified bottlenecks in service-to-service calls and database query patterns, reducing API timeout and failure incidents by **60%**
- Built **RESTful Ruby on Rails** endpoints integrating **AWS S3** and **AWS Lambda** for asynchronous file-processing workflows; reduced API error rates from **8%** to **1.5%** through improved validation and retry handling
- Led development of a **React Native** mobile platform for **Vincent AI**, a legal focused **LLM-powered chatbot**, during a company-wide hackathon; built end-to-end in **48 hours** and finished top **5** among **50+ teams**
- Shipped **3** features across **Clio Manage** and **Vincent AI**, improving usability across high-traffic mobile workflows
- Optimized **React Native** rendering and state management, reducing load latency by **30%** across high-traffic user flows

CIBC Capital Markets

Software Developer Intern

Toronto, ON

May 2024 – Dec 2024

- Built **Python** and **Java** microservices powering internal data pipelines on **Azure**, automating cross-team reporting workflows and eliminating repetitive manual reporting tasks
- Designed and implemented automated API testing frameworks using **REST Assured**, increasing QA coverage by **30%** and improving API reliability and regression coverage across services
- Built **CI/CD** monitoring dashboards in **Azure DevOps**, reducing incident detection and response time by **40%**
- Integrated **CI/CD pipelines** across teams, reducing manual deployment effort by **60%** and improving release consistency

Fresh Water Foods Inc.

Web Developer

Richmond Hill, ON

Jan 2024 – Apr 2024

- Built and deployed a responsive business website using **HTML**, **CSS**, and **Bootstrap**, establishing the company's online presence

PROJECTS

AI Fitness Form Detection App | *Python, React Native, MediaPipe, Supabase, FastAPI, scikit-learn*

- Built a full-stack mobile application that analyzed exercise form using computer vision and pose estimation
- Designed a **FastAPI** backend handling video ingestion and processing pipelines with **PostgreSQL** and **Supabase**
- Implemented pose-analysis logic to detect improper form, including limited range of motion and left/right asymmetry
- Built a scalable **React Native** frontend integrated with **REST APIs** for responsive real-time performance

NBA Player Clustering & Similarity Engine | *Python, Flask, scikit-learn, Pandas, NumPy, Matplotlib*

- Developed a machine-learning model that clusters NBA players by playstyle using advanced efficiency and rate statistics
- Engineered normalized playstyle vectors and applied **K-Means** and **cosine similarity** to quantify stylistic similarity
- Implemented **PCA** for dimensionality reduction and built a **Flask** web app that visualizes player networks and supports interactive similarity queries
- Built a modular preprocessing and **inference pipeline**, preparing for **REST API** integration and cloud deployment

TrackME | *Python, JavaScript, Django, Chart.js, NumPy*

- Built a full-stack personal finance tracker using **Django** backend and **Chart.js** dashboards for real-time expense analytics
- Implemented custom **Isolation Forest** and **K-Means** models to flag unusual spending patterns
- Integrated external **APIs** to deliver personalized financial insights and recommendations

TECHNICAL SKILLS

Languages: Python, Ruby, Java, JavaScript, TypeScript, SQL

Frameworks/Technologies: React, React Native, Node.js, Django, Flask, FastAPI, Ruby on Rails

Cloud: AWS (S3, Lambda), Azure, Supabase (Auth, PostgreSQL, Storage)

Databases: MySQL, PostgreSQL, MongoDB

DevOps & CI/CD: Git, GitHub Actions, Azure DevOps, Azure Pipelines
