EDUCATION

Wilfrid Laurier University

Waterloo, ON

Bachelor of Science in Computer Science (Big Data Systems Concentration) – Minor in Mathematics

Sept 2022 – Current

- **Relevant Coursework:** Software Engineering, Databases, Data Structures, Operating Systems, Computer Networks, Algorithm Design & Analysis

EXPERIENCE

Clio

Toronto, ON

Software Developer Intern

Jan 2026 – Mar 2026

- Shipped production React Native features across **Clio Manage** and **Vincent AI**, supporting workflows used by **150,000+** users and improving feature adoption and user engagement
- Designed and scaled **Ruby on Rails REST APIs** integrated with **AWS (S3, Lambda)**, reducing API error rates by **20%** and improving backend reliability under production load
- Diagnosed and resolved production issues using logging and monitoring tools, identifying API bottlenecks and improving system stability and crash resilience by **60%**
- Led end-to-end development of an AI-powered mobile prototype (**Vincent AI**), integrating **chatbot APIs** into a React Native app and delivering a functional system within **48 hours** during a company-wide hackathon
- Optimized **React Native** rendering and state management, reducing load latency by **30%** across high-traffic user flows

CIBC Capital Markets

Toronto, ON

Software Developer Intern

May 2024 – Dec 2024

- Built **Python** and **Java** microservices powering internal data pipelines on **Azure**, automating cross-team reporting workflows and reducing manual processing overhead
- Built **CI/CD** monitoring dashboards in **Azure DevOps**, reducing incident detection and response time by **40%**
- Designed and implemented automated API testing frameworks using **REST Assured**, increasing QA coverage by **30%** and improving data reliability across services
- Integrated **CI/CD pipelines** across teams, reducing manual deployment effort by **60%** and improving release consistency

Fresh Water Foods Inc.

Richmond Hill, ON

Web Developer

Jan 2024 – Apr 2024

- Built and deployed a responsive business website using **HTML**, **CSS**, and **Bootstrap**, improving digital presence

PROJECTS

AI Fitness Form Detection App | *Python, React-Native, MediaPipe, Supabase, FastAPI, Scikit-Learn*

- Built a full-stack mobile application that analyzes exercise form using computer vision and pose estimation
- Designed a **FastAPI** backend handling video ingestion and processing pipelines with **PostgreSQL** and **Supabase**
- Implemented biomechanical validation logic to detect range-of-motion and asymmetry violations
- Built scalable **React Native** frontend integrated with **REST APIs**, optimizing feedback latency for near real-time performance

NBA Player Clustering & Similarity Engine | *Python, Flask, Scikit-learn, Pandas, NumPy, Matplotlib*

- Developed a machine-learning model that clusters NBA players by playstyle using advanced efficiency and rate statistics
- Engineered normalized playstyle vectors and applied **K-Means + cosine similarity** to quantify stylistic similarity
- Implemented **PCA** for dimensionality reduction and built a **Flask** web app that visualizes player networks and supports **interactive similarity queries**
- Built a modular preprocessing and **inference pipeline**, preparing for **REST API** integration and **cloud deployment**

TrackME | *Python, JavaScript, Django*

- Built a full-stack personal finance tracker using **Django** backend and **Chart.js** dashboards for real-time expense analytics
- Applied anomaly detection using **Isolation Forest** and **K-Means** to identify unusual spending patterns (**92%** accuracy)
- Integrated external **APIs** to deliver personalized financial insights and recommendations

TECHNICAL SKILLS

Languages: Python, Ruby, Java, JavaScript, TypeScript

Frameworks: React, React Native, Node.js, Django, Flask, Ruby on Rails

Cloud: AWS, Azure, Databricks, Apache Airflow

Databases: MySQL, PostgreSQL, MongoDB

DevOps & CI/CD: Git, GitHub Actions, Azure DevOps, Azure Pipelines
