EDUCATION

Wilfrid Laurier University

Waterloo, ON

Bachelor of Science in Computer Science (Big Data Systems Concentration) – Minor in Mathematics

Sept 2022 – Current

- **Relevant Coursework:** Software Engineering, Databases I/II, Data Structures I/II, Operating Systems, Algorithm Design & Analysis, Computer Networks

EXPERIENCE

Clio

Toronto, ON

Software Developer Intern

Jan 2026 – Curr

- Shipped production **React Native** features across Clio's mobile ecosystem (**Clio Manage (AI)**, **Clio Client**), supporting **high-traffic workflows** used daily by legal professionals and their clients
- Optimized **React Native components** and **state management patterns**, improving **screen responsiveness** and reducing **performance bottlenecks** across core user flows
- Built and extended **Ruby on Rails APIs** powering **AI-enabled and mobile features**, enabling **secure, low-latency communication** between mobile clients and **AWS-backed services**
- Investigated and resolved backend production issues, improving application stability, reliability, and crash resilience
- Collaborated cross-functionally to drive features from design through deployment within an **agile product team**

CIBC Capital Markets

Toronto, ON

Software Developer Intern

May 2024 – Dec 2024

- Developed **internal applications** using **Python, Java, JavaScript**, and **Azure**, supporting **cross-team data integration** and automated reporting workflows for operational and QA use cases
- Built **monitoring and deployment dashboards** in **Azure DevOps** to track **CI/CD pipelines** and runtime health, reducing incident detection and response time by **40%**
- Designed and implemented **automated REST API tests** with **REST Assured**, validating **data contracts** and **edge cases**, increasing QA coverage by **30%** and improving data reliability
- Collaborated with engineering teams to integrate **CI/CD workflows** in **Azure DevOps**, streamlining **deployment pipelines** and reducing manual deployment effort by **60%**

Fresh Water Foods Inc.

Richmond Hill, ON

Web Developer

Jan 2024 – Apr 2024

- Built and deployed a responsive website, enhancing online presence for potential clients
- Worked directly with the owner to create a user-friendly interface to ensure easy navigation and product display
- Implemented responsive design using **HTML/CSS** and **Bootstrap**, ensuring compatibility across various devices and improving user experience

PROJECTS

Accountable Workout | *Python, React-Native, MediaPipe, Supabase, FastAPI, Scikit-Learn*

- Built a full-stack mobile app that analyzes exercises using pose estimation to detect reps and generate form feedback
- Designed a **FastAPI** backend handling video ingestion and CV pipelines with **PostgreSQL + Supabase**
- Engineered rule-based biomechanical validation logic using **MediaPipe**, **NumPy**, and **OpenCV** to detect range-of-motion, depth, and asymmetry violations
- Designed scalable **React Native (TypeScript)**-backend integration with **REST APIs** and optimized feedback latency

NBA Player Archetype | *Python, Flask, Scikit-learn, Pandas, NumPy, Matplotlib*

- Developed a machine-learning model that clusters NBA players by playstyle using advanced efficiency and rate statistics
- Engineered normalized playstyle vectors and applied **K-Means + cosine similarity** to quantify stylistic similarity
- Implemented **PCA** for dimensionality reduction and built a **Flask** web app that visualizes player networks and supports **interactive similarity queries**
- Built a modular preprocessing and **inference pipeline**, preparing for **REST API** integration and **cloud deployment**

TrackME | *Python, JavaScript, Django*

- Created a personal finance tracker with **Django** backend and **Chart.js** data visualization
- Applied **K-Means clustering** and **Isolation Forest** achieving **92%** accuracy for anomaly detection
- Integrated **News API** for personalized financial literacy recommendations

TECHNICAL SKILLS

Languages: Python, Ruby, Java, JavaScript, TypeScript, R, HTML/CSS

Frameworks: React.js, Node.js, Django, Flask, Ruby on Rails

Cloud: Databricks, Apache Airflow, AWS, Azure

Databases: MySQL, MongoDB
